JOSIANE RISSACO responsable administrative, utilise quotidiennement le pack office,

les navigateurs web et d'autres logiciels de gestion administrative.

Sur un document pdf créez une configuration matérielle d'un ordinateur fixe (seulement l'ordinateur, pas de périphériques) correspondant aux besoins de notre jeune responsable administrative.

- Josiane dispose d'un budget maximum de 800€
- Expliquez le choix de chacun des composants. Soyez technique

J'ai choisi ces composants car il répondait complètement à la problématique de Josiane c'est un dire un ordinateur de gestion administrative qui lui permet de naviguer sur internet et d'utiliser la suite Office sans problème.

Je lui ai trouvé un ordinateur pour c'est besoin et au prix qui lui convenait

J'ai utilisé le site Topachat pour être sûr de prendre des composants compatibles.

- ALAN SCESPASS n'a pas aimé son expérience sur CS:GO, les graphismes lui piquent les yeux et il souhaite maintenant jouer à des jeux plus poussés graphiquement, son prochain objectif est de jouer à des jeux en 4k, HDR, RTX, de manière stable.

Sur un document pdf créez une configuration matérielle d'un ordinateur fixe (seulement l'ordinateur, pas de périphériques) correspondant aux besoins du futur pro gamer.

- Alan dispose d'un budget maximum de 4500€
- Les pc déjà monté et kit évolution ne sont pas autorisés
- Expliquez le choix de chacun des composants. Soyez technique

J'ai choisi ces composants qui répondra complètement à la problématique de Alan c'est un dire un ordinateur gaming qui puisse supporter de 4k, HDR, RTX de manière stable pour la qu'il puisse profiter au maximum de sa configuration et lui permettre de jouer en bonne condition.

Je lui ai trouvé un ordinateur pour c'est besoin et au prix qui lui convenait

J'ai utilisé le site Topachat pour être sûr de prendre des composants compatibles.

ROGER ANAUXMOS souhaite créer un NAS personnel chez lui, son objectif est d'avoir sa vidéothèque complète chez lui. Étant donné que son équipement audiovisuel est de de bonne qualité, il souhaite pouvoir visualiser des films en 4K depuis son NAS. Bien sûr, toutes ses données doivent être redondées grâce à un RAID.

- Roger dispose d'un budget maximum de 1200€
- Expliquez le choix de chacun des composants. Soyez technique
